

Field Name	Field Description
Created Date	The date in which the case was created within JICMS. This data is set automatically by the system when the case is created.
Case Closed Date	The date the case was set to a closed state and no longer needs actions. This date is set automatically by the system when the cases status is set to closed.
Case Resolution Code	Upon completion of the investigation into all the allegations, the finding for the most egregious substantiated allegation. If none of the allegations were substantiated, then the finding for the most egregious unsubstantiated allegation.
Case Number	A computer-generated unique and sequential nine-digit identification case file number in the format of YYYYnnnnn for each case created. The four digit year is based upon a fiscal year beginning on October 1 and ending on 30 September. The five digit sequential number is reset to "00001" upon the creation of the first JICMS case of each fiscal year.
Case Type	A categorization of the type of case that helps to determine the workflow steps and the necessary artifacts.
Case Status	Used to indicate at the current stage of the case's investigation. This may be populated automatically by the system or selected from an LOV by the user.
Incident Date	The date on which the alleged incident initiated.
Case Summary	A brief description of the alleged incident. No SPII information is permitted in this field.
